

RM-10620

**From:** ak437@acorn.net **EX PARTE OR LATE FILED**  
**To:** Michael Copps  
**Date:** Fri. Jan 17, 2003 2 44 PM  
**Subject:** Urgent Need - Fwd Re RM-10620 Your Help Is Need & thanks for your support

Attached below is a "Typical" type of comment received here with regards to up-grades. I would suggest that you have Mr. Bill Cross of the WTB look into this fellows needs. My original RM left out this "Displacded Class" of generals by accident. Several Have filled like comments! This should be addressed asap or with my Requested RM. Thank You

Dale E Reich

EX PARTE OR LATE FILED

**From:** dale reich  
**To:** Commissioner Adelstein  
**Date:** Mon. Feb 10, 2003 2:11 PM  
**Subject:** Radio Interference Report - Please Relay to the FOB enforcement chief

ATTN: Field Enforcement Bureau - Detroit, Michigan District

RE: Radio Interference Report

I've have been ask to look into a problem with of Radio Interference to Telephone Land Land Lines in the Greater Wadsworth. Ohio 44281 area. This request was from a friend and associate.

In the area of Mill Street in the 200 block of the downtown area this friend has been receiving "Police Calls" over here telephone system. This friend has made several attempts to have the local telephone company resolve this to no end.

I looked the area over and found only one antenna on 220 Mill Street in back of the house. Monitoring in the area there was a very high powered SSB CB station at times operating well above the normal levels for a CB station. There is a AM station on the CB band with background of a Scanner that is playing games over the air.

In checking the area for other types of CB antennas there are several within a few blocks including one on a high rise one block to the south

Confidential information about this I have some information and the name of the troublede person

Please Contact Me - - RE the confidential information

EX PARTE OR LATE FILED

**From:** ak437@acorn.net  
**To:** Mike Powell  
**Date:** Thu, Feb 13, 2003 6:36 PM  
**Subject:** RE // RM-10641 // Pending // Fwd: registration of radios....

This Comment ending FEB 28th period on Add'l RM-10641 Only. SEE Below signature for "Strange Email received" 8 Thanks,,.

This is the typical "static" I'm receiving about the RM-10641 before the commission. The protest go's on about "Showing I D to purchass a 2 way radio, or showing proof of license, and posting name and address of licensee, or owner of the equipment on the 2 way radio.

From about 1934 till some time about 1980s the commission required the "old" FCC form 452-C or a Revised Sticker Called a 452-C 'Revised on mobile or portable trasmitters showing proof of athority to operate.

In view of the "media reported fact' that the "Washington Sniper" had Comrnical or GMRS radios, and no license, no athroity, and purchased the units in a over the counter, with out getting a license or athroity to operate is a serious issue. The fact that the police had did a surface only search days or weeks before and found the radios, then gave them back on a "CONTORBAND' or "Un-licensed 8 Illegal" radio is the second thing wrong. The police officers ask what the radios were for and the "Sniper" stated they were for "Hunting". The **use** of 2 way radios for "Hunting" is Illegal in 2/3 of the States! This makes it a "Criminal Tool" in almost all the nation.

The facts are not clear in the "Washington Sniper" case, however only going from "media reports" there is a clear "loop hole" in FCC regulations that need to be addressed.

So Look at the electronic letter I received to day, and please think we did have "Taging" in the past, and that showing proof of license or true ID is no more trouble than buying "Tobacco or Beer" at a local supermarket.

Most major retail stores keep "customer lists" or "True ID" for there data base. The major objections that have been filled have been from small vendors that "seek' to keep the same way of doing business. Perhaps the objections come from some of the "felows" who sell the Illegal equipment that shows up on the Police / Fire / EMS / Busienss Band / Marine Radio / Avation Radio and other Service the Commission is control of!

There are only (2) radios service the commission regulates that requires the operator to have in his possession actual or photo copy of License while mobile or walkie talkie! There are some 17 other that should be required to "show proof of athority to operate". The Wireless Phone and Wireless Phone's that are served by the telecom / PTS **system** should be exemp from this "taging" as they are strong regulated and have a data base on most, with electronic serial numbers ID.

I also notice that some of the objections filled state that they are good dealers who would not **sell** to a un-licensed operator. The object control the "un-ethical vendor" who seeks to "profit" from selling

**RECEIVED****MAR 13 2003**

Federal Communications Commission  
 Office of the Secretary

2 way radio equipment or illegal equipment that will go on to cause trouble to commission, national security, and the lawful end user.

I have received only one e-mail on RM-10641 in support, and several against from what can only be addressed as strange persons. I plan to sent cyps to the commission of all e-mail received on this RM-10641 the last week of the comments by regualr mail if time permits.

Again Thanks,

ARLBOI 1 FCC Invites Comments on Amateur-Related Petition

Dale Reich, K8AD has petitioned the FCC to require sellers of two-way voice or data equipment to keep on file a buyer's name address, telephone number and "any future information when selling a radio that required licensing under the current FCC rules" Comments on the petition. RM-10641, are due February 20.

Information collected would remain private, available only to the FCC or law enforcement. Reich said in his petition that any retail vendor would be able to ask local police for an investigation if the retailer suspected the radios were not going to be used in compliance with the law.

Included in the petition is a requirement for "ownership and license tagging" for gear operating under Parts 5, 15, 18, 74, 80, 90, 95 and 97. In his petition, Reich said such tagging used to be an FCC requirement and that his proposed change was a needed tool for local law enforcement.

The full text of Reich's petitions is available on the FCC Web site. Search for the petition number

Sirs:

attached below is a e-mail that I received about a reported rule change, however there is no pending RM for it ? ? ? I also have submitted a more complex series of changes requested with no "RM" for it. This too has not been posted also

I support in part the below change also. You may wish to look into the missing

"RM" perhaps they are setting on someone's desk's on "Hold", and Thanks!

**Subject:** U.S. Marshall off duty dealing in Contraband Radio Equipment - CFR Violations ?

Hello:

I went to a electronic trade show over the week end. in a blinding snow storm!

At the electronics "trade show" there was a "vendor" there who was selling a Varmit 600 Watt CB Linear Amp [Used Condtion] This item is a Controband item under FCC Code of Federal Regualtions - 47 C.F.R. Sub Parts 2 - 95 - 97 for the end user to operate, but to "market" to another "ham" from a "Ham" under part 97 may not be a violation [Very Restricted] and limited [Gray Area of Enforcment] at present. However the "Vendor" did not have any other "Ham" Radio Equipment in the immediate sales area. The only equipment in his "Rented' location was "CB Radios" witch the Varmit Linear was setting along side of. However, Stressing from information I was advised of the fellow who was selling the CONTRABAND Varmit 600 Linear Amplifier, owns a CB Radio Shop, is a "Police Officer", and a "US Marshall" from overheard word on the "Street"! This may be kind of "HIPOCRITAL" but a "Police Officer" & a "U.S. Marshall" [Both] dealing in "Contraband - Illegal - CB Radio" Equipment! I even obtained one of this fellows "Business Card" witch states no Ham Call Sign [Amateur Radio License] I would suspect he's not a Licensed Ham! His Business Card also states in print [Printers Ink] "Buying CB Linears Working or Not"! The shops location, is printed on the card, as well as the directions to go to his store. He has a strange "Email" that raises more questions then the average CB Shop. I've been past this palce and recall no CB store there, perhaps I'm not looking well! OH Well a nother "Hypocrite Cop" dealing in "Contraband" Shame on the U.S. Marshalls Service, Shame - Shame - Shame!

**Subject:** RE: Several Issues - FYI

Sir:

As soon as my e-mail is up and running at acorn / net I will be sending in via Regular US Mail Hard cyps of e-mail sent to me via "ABSERB and "Normal" people "opposing" and "For" the REquest for "RM-10641" on the FCC table now. I will send both "For" and "Against" next day or two upon recover and print of my e-mail file witch is down and up today.

Also about the US Marshall dealing in Un-Authorized CB equipment you received a e-mail, I will be sending each of the Commissioners a Enlarged Copy of the the Business Card via US Mail next day or so.

I would hope you deal with this instead of "Shelving" it as so mutch "Hams" have talked on the "Air" about the lack of true enforcment of the FCC rules

Varmeit 600 Watt CB linears Amps, have cause major problems with the 118 Mhz to 136 Mhz Aircraft Radio Service! High Poweered CB on the 5th harmonic through a bad mfg amp can produce interferaence at a grater power level than the FAA stations braodcast Safety of Avaiation radio is the issue.

Thanks

**Subject:** RM-10641 - Updates / Remarks Gun's & Radios

MAR 13 2003

Federal Communications Commission  
 Office of the Secretary

Hello

Well I've take a lot of "Flack" from the "Ham" & "C B Community about RM-10641 involving the point of sales & tagging of radio equipment.

I spent several hours from one caller from the west coast who had strong "objections" to both of my RM's that have been posted. This fellow used the "F" word in his communications about every 20 th word or so! I have no objection to his "F" word in print, oral communications from anyone using it [Over the Broadcast Media, or Involved in Radio/TV] I do have objections to its **use**.

This fellow who was highly upset that his "RM" were not acted upon, was shocked as How Easy I could get my "RM's past the "Commissioners & Bureau Chiefs's of the FCC. with out being sent back.

He spent most of the time speaking of my GRAMMAR, and SPELLINGS as I have a "Small to Severer" "H" Handicap in communications, and this is nothing new to me. The fact that I use a Library Computer and the "Spell Check" will not work on all the terminals also upset him. The Library "Filters" block access to functions, some time will not work, and other time's lose DRAFTS of messages.

This fellow hammered upon me for more than 2 hours about my "RM", but my goal in talking to him was to find out his "Gripes". The fellow who would not calm down, stated I mixed up past history a bit, and also mixed it with my future proposals in the "R M request for changes. Well "History has a point of VIEW and all people don't see history as a "Fluid" for of "Solid Science" of TRUTH, or FACT.

Searching this fellows remarks from what little I could pry out his "Hate" for the "Commission" and any thing

that would abridge his 4th Amendments Rights to Have Gun's or Radio's! Makes Me think of his "Convolutd"

judgment. This fellow should have addressed my rite's under the 1 st & 5 th Amendments [For or Against] a issue

This fellow ask if I had any other "RM" that were pending, and I told him I would suspect that there are about

13 or so on the desk marked "Hold" [By the commission] that are wide request issues to bring back some control of a out of control or non-control way the WTB and other FCC bureaus have so "Deregulated" radio

that the "Commission" failed to protect the public with a pattern of non-enforcements! [ OF SORTS] !!!

I told him that some of the not posted or not pending "RM's" setting on hold were far to complex to ever pass! This fellow demanded I have them "RECALLED" and not posted he was upset! I told him I don't expect recall them, and gave him a outline of some of the items

He did not have kind word for Mr. Riley "William" Hollingsworth, Gettysburg Office, enforcement chief of Part 90, 95, 97 and other sub-parts of the Licensing Bureau of the FCC.

I told him of the "Enforcement" issue that the FCC was engaging in by returning my complaints, as well of "Scores" of other Complaints that the commission has not the Money, or Time to address. Several rounds of over the air complaints including operators from 80 through 10 meters who "stuff" has been returned, and not acted upon. The commissions "Token Enforcement" program is at present "Cost Effective" they feel as if it is "adequate". however in not logging the complaint with a "Case Number" and returning it looks as if the "FCC Staff" is doing a BANG UP JOB, and every ones happy. This is far from the TRUTH.

With Regards to the "RM-10641" perhaps the commissioners could consider this request to be applied to "Selective" enforcement area of the need-ed radio services that requires remedial enforcement protection of the public's need's!

With Respect, Thanks
